

**SYSTEM, METHOD AND COMPUTER PROGRAM PRODUCT FOR AN
ELECTRONICS AND APPLIANCES SUPPLY CHAIN MANAGEMENT
FRAMEWORK**

5

ABSTRACT

A system, method and computer program product are disclosed for managing an electronics and appliances supply chain utilizing a network. A network is utilized to
10 receive data from a plurality of electronics and appliances outlets of an electronics and appliances supply chain in which the data relates to the sale of electronics and appliances by the electronics and appliances outlets. An electronic order form is generated based on the data for ordering electronics and appliances from an electronics and appliances distributor of the electronics and appliances supply chain. The data is transmitted via the
15 network to the electronics and appliances distributor of the electronics and appliances supply chain. The data is also transmitted to an electronics and appliances supplier of the electronics and appliances supply chain utilizing the network. Additionally, activity in the electronics and appliances supply chain is forecast utilizing the data.
